STANDARD OPERATING PROCEDURE

LMS Operations Workflow 2027

From PLO request to completion report on Connect@CTLI

DOCUMENT	SOP: LMS Operations Workflow 2027	VERSION	1.3
DATE ISSUED	26 October 2026	APPLIES FROM	January 2027
OWNER	CTLI Process Team (LMS Administration)	NEXT REVIEW	October 2027, or sooner if the workflow changes

1 Purpose

This SOP sets out how a PLO on Connect@CTLI (Moodle) moves from a training coordinator's request to a finished completion report. It makes sure every PLO is set up the same way, checked before teachers see it, and reported on correctly.

Follow it for every PLO run in 2027. If a step cannot be followed, speak to the LMS Admin before you go ahead.

2 Scope

All CTLI units that run PLOs on Connect@CTLI in 2027:

LA_SMLDP	Leadership Academy: School Management and Leadership Development Programme
LA_SMLDC	Leadership Academy: School Management and Leadership Development Courses
FP	TPI: Foundation Phase
IP	TPI: Intermediate Phase
SP	TPI: Senior Phase
IE	TPI: Inclusive Education
NTI	TPI: Novice Teacher Induction
FET	TPI: Further Education and Training
EDULIS	EDULIS: Library and information services
PD	Professional Development (PDD)

PLOs, including courses, webinars and other events, run on Connect@CTLI (Moodle). The LMS Admin can be reached at connect.ctli@wced.info.

AT A GLANCE

How a PLO moves through Connect@CTLI

Three stages, twelve steps. The envelope shows where an automatic email goes out.

1 STAGE 1 Request and quality check

As early as possible (see What you can request)

- **1.1** Submit the PLO shell request — TC
- **1.2** Set up the PLO shell and keep it hidden — LMS Admin
- **1.3** Run the quality check — PDD + TC
- **1.4** Confirm the quality check — TC + LMS Admin

2 STAGE 2 Load participants and open

1 to 2 weeks before the opening date

- **2.1** Complete the cohort sheet — TC + Intern
- **2.2** Upload participants — LMS Admin
- **2.3** Check and correct enrolments — TC + Intern
- **2.4** Open the PLO — LMS Admin

3 STAGE 3 Close and report

On the closing date

- **3.1** Close the PLO — LMS Admin
- **3.2** Build the completion report — LMS Admin
- **3.3** Send and file the report — LMS Admin
- **3.4** Update the dashboards — LMS Admin + TC

Where each stage sits against the PLO dates

3 Roles and responsibilities

Training Coordinator (TC)	Requests the PLO shell, tests it with PDD, owns the unit cohort sheet, checks enrolments and receives the completion report.
Unit intern	Captures and checks participant details in the cohort sheet. May fix enrolments on Moodle, but always tells the LMS Admin.
LMS Admin	Assigns the Moodle short name and cohort code, sets up, opens and closes the PLO, uploads participants, builds reports and updates the dashboards. Shared inbox: connect.ctli@wced.info
PDD	Runs the quality check with the TC before the PLO is opened to participants.
Unit Head	Receives the completion report by email (listed on the Unit Heads tab of the request sheet) and uses the unit dashboard for planning.

4 Key terms

PLO	Professional Learning Opportunity: anything CTLI offers teachers on Connect@CTLI, such as a course, a webinar or another event.
Shell	The PLO's space on Connect@CTLI, set up by the LMS Admin. A shell can be brand new or a copy of an existing PLO shell.
Opening date	The day the PLO opens on Connect@CTLI and participants can get in.
Official start date	The start date as advertised to teachers.
Official end date	The end date as advertised to teachers.
Closing date	The day the PLO closes for reporting. Completion reports are only built after this date.
Moodle short name and cohort code	Moodle identifiers for the PLO run. The LMS Admin assigns both once a request comes in, so the TC does not need them.
Course, district and school groups	Every participant is placed in all three groups when uploaded. This makes reporting by course, district and school possible.
Request Tracker	Shows each request, its step out of 7 and what happens next. TCs check it instead of emailing for updates. It also flags dates in the wrong order and PLOs that open within 2 weeks.
Status	Set by the LMS Admin on the request sheet: Requested, Activated (hidden), QC passed, Participants loaded, PLO open, PLO closed, Report sent. Each change sends the matching email and moves the Tracker on.
Cohort sheet	Each unit's own Google Sheet of participants. All unit sheets feed the Master participant data.
CTLI Master Dashboard	Holds completions for all units. Each unit dashboard pulls only its own unit's numbers from it.

5 Procedure

Each step lists who does it, what to do, what you should have at the end, and the links you need.

What you can request

You can use the Shell Activation Request form to:

1. **Request a brand new shell on Connect@CTLI**
   Send this request as early as possible: at least 4 weeks before your PLO must run on the LMS.
2. **Request a copy of an existing shell on Connect@CTLI**
   Send this request as early as possible: at least 4 weeks before your PLO must run on the LMS.
3. **Request the addition of a cohort to an existing PLO on Connect@CTLI**
   Send this request as early as possible: 1 to 2 weeks before your PLO must run on the LMS.

You will get an acknowledgement receipt by email from the LMS Admin, and you can follow your PLO on the Request Tracker.

Stage 1: Request and quality check

As early as possible (see What you can request)

The PLO is set up on Connect@CTLI but stays hidden until it passes the quality check.

1.1 Submit the PLO shell request

Who: TC | Automatic email

Complete the Shell Activation Request form as early as possible, using the lead time for your request type (see What you can request). Give the TC's name and email address, the delivery unit, the request type, the full PLO name as listed in Annexure A, the existing PLO (for a copy or a new cohort), the expected number of participants and the four dates: opening, official start, official end and closing. For a once-off event such as a webinar, use the same date for start and end. You do not need the Moodle short name or cohort code.

Result: The LMS Admin inbox gets an alert and you get an acknowledgement receipt by email from the LMS Admin. The request shows on the Request Tracker. Tracker status: Requested.

1.2 Set up the PLO shell and keep it hidden

Who: LMS Admin | Automatic email

Assign the Moodle short name and cohort code, set up the PLO shell on Connect@CTLI and keep it hidden from participants. On the request sheet, fill in Course short name (the Moodle short name), Cohort and Moodle link, then set the Status. The email only goes out once all three are filled in.

Result: The TC gets an email with the PLO link, short name and cohort. Tracker status: Activated (hidden).

1.3 Run the quality check

Who: PDD, TC

PDD and the TC test the PLO together: content, activities, completion settings and dates. Fix anything that does not work before moving on.

Result: A PLO that is ready for participants.

1.4 Confirm the quality check

Who: TC, LMS Admin | Automatic email

The TC lets the LMS Admin know that the quality check passed. The LMS Admin sets the Status. The PLO stays hidden until this step is done.

Result: The TC and the LMS Admin inbox get an email reminding the TC to finish the cohort sheet. Tracker status: QC passed.

Stage 2: Load participants and open

1 to 2 weeks before the opening date

Participants are loaded from the unit cohort sheet, checked, and the PLO opens on the opening date.

2.1 Complete the cohort sheet

Who: TC, Intern

Capture every participant in your unit's cohort sheet and check names, email addresses, district and school. PERSAL and EMIS numbers are not needed. Leadership Academy captures LA_SMLDP and LA_SMLDC participants on their own sheets.

Result: A complete, checked cohort sheet.

LINKS Your unit cohort sheet (section 7)

2.2 Upload participants

Who: LMS Admin | Automatic email

Upload participants from the cohort sheet into the course, district and school groups, then set the Status.

Result: The TC gets an email with the PLO link to check the participant list. Tracker status: Participants loaded.

2.3 Check and correct enrolments

Who: TC, Intern

Check the enrolments on Connect@CTLI against the cohort sheet. Interns may correct enrolments on Moodle, but must always tell the LMS Admin what was changed.

Result: Enrolments match the cohort sheet.

2.4 **Open the PLO** Who: LMS Admin | Automatic email

Make the PLO visible on the opening date given in the request, then set the Status.

Result: Participants can get into the PLO. The TC gets an email with the official dates and the closing date. Tracker status: PLO open.

Stage 3: Close and report — On the closing date

Reports are only built once the PLO has closed. The data then flows to the dashboards.

3.1 **Close the PLO** Who: LMS Admin | Automatic email

Close the PLO for reporting on the closing date given in the request, then set the Status.

Result: The TC gets an email that the PLO has closed and the report is being built. Tracker status: PLO closed.

3.2 **Build the completion report** Who: LMS Admin

Build the completion report from the Moodle completion data, using the course, district and school groups.

Result: A completion report for the PLO run.

3.3 **Send and file the report** Who: LMS Admin | Automatic email

Save the report in the unit's report folder. Paste the report link into Report link on the request sheet, then set the Status. The email goes to the TC and to the Unit Head listed on the Unit Heads tab.

Result: The TC and the Unit Head have the report. The Request Tracker shows the PLO as complete. Tracker status: Report sent.

LINKS Your unit report folder (section 7)

3.4 **Update the dashboards** Who: LMS Admin, TC

Paste the Moodle completions once into the CTLI Master Dashboard. The unit dashboard updates from there. The TC checks the unit dashboard.

Result: Master and unit dashboards are up to date.

LINKS Your unit dashboard (section 7)

6 Rules to follow

- Send requests as early as possible: at least 4 weeks before your PLO must run on the LMS for a brand new shell or a copy of an existing shell, and 1 to 2 weeks before for a new cohort on an existing PLO.
- No PLO opens to participants before the quality check is confirmed.
- Only the LMS Admin changes the Status on the request sheet. Nobody types on the Request Tracker tab: it updates by itself.
- Participant details go into the unit cohort sheet, not into emailed lists.
- Any change made on Moodle by a TC or intern is reported to the LMS Admin.
- Completion reports are only built after the closing date.
- Completions are pasted once, into the CTLI Master Dashboard only. Unit dashboards are never edited by hand.
- Unit dashboards show only that unit's numbers. Only the Master Dashboard shows all units.
- Leadership Academy keeps LA_SMLDP and LA_SMLDC separate in every file.

7 Unit links

Each unit's cohort sheet, dashboard and completion reports folder. Click Open to go to the link. Links are taken from the Connect@CTLI Workflows 2027 site when the PDF is downloaded.
